대학생 시기는 곧바로 다가오는 성인기의 삶을 대비하는 과도기적 준비기로 자기에 대한 관심과 학습하고 사회와 환경에 적응해야 하는 것이 중요한 발달과업이라 할 수 있다. 이 시기의 긍정적 적응 여부는 이후의 성인기에까지 영향을 미치게 되므로, 심리적으로 건강하고 행복을 누리는 것은 대학생 개인뿐만 아니라 건강한 사회를 위해서도 매우 중요하다. 우리나라 대학생들은 보통 일석위주의 교육세로 인해 여러 가지 고민들이 유발되다가, 대학생이 되고 난 후부터 비로소 갑자기 가치관, 진로, 적성, 이성관계, 대인관계 등 새로운 문제에 당면하게 된다(이시은, 2009). 또한 최근 취업난이 심해지면서 대학생들이 소위 '스펙' 관리에 몰두

The first of these, Hong Kong Martial Arts Living Archive (HKMALA), was instigated in 2012 and is an ongoing research collaboration between the International Guoshu Association, City University of Hong Kong, and the Laboratory for Experimental Museology (eM+) at EPFL, and has resulted in seven international exhibitions, including *Kung Fu Motion* at EPFL's ArtLab (2018)¹ and the Immigration Museum Melbourne in 2017, and *300 Years of Hakka Kung Fu* (2016)² at the Heritage Museum and CityU Gallery³, Hong Kong, China. The archiving project responds to the decline of Southern Chinese Kung Fu in mainland China, where a significant portion of traditional martial arts have already vanished. Hong Kong remains a vibrant center for elite practitioners and is home to some of the most prominent martial artists in the world; however rapid urban development, population growth, cultural transformation and the aging of the masters are endangering these practices.

HKMALA brings together historical materials with creative visualizations derived from advanced documentation processes, including motion capture, motion-over-time analytics, 3D reconstruction, and panoramic video (Figures 1 and 2). These archival materials are re-interpreted and re-performed through the mediums of augmented virtual reality and interactive media art, such as *Kung Fu Visualization*³ (2016). As a panoptic virtual reality environment, the Re-ACTOR system shows the intricate dynamics of the kung fu master's reenacted performances via serial 3D motion-captures from six different points of view, with an interactive control panel that allows visitors to select six different visualization styles that elucidate the underlying dynamics of the master's movements (Figures 3 and 4).

The HKMALA 'living archive' also uses new immersive and interactive display paradigms to perpetuate the performance of past masters for future generations. The *Kung Fu Weapons Archive*⁴ (2016) is a linear navigator that provides a sliding panorama of Hakka Kung Fu weapons and training tools, as well as interactively located video demonstrations of their use by Kung Fu masters. Whenever the viewer slides the screen over one particular object, it triggers a short video clip showing the Kung Fu master's handling of that respective weapon or training tool (Figure 5). With these new approaches HKMALA creates practical strategies for encoding, retrieving, and reenacting

2 The Goliath of the Sea

The majestic blue whale, the goliath of the sea, certainly stands alone within the animal kingdom for its adaptations beyond its massive size. At 30 meters (98 ft) in length and 190 tons (210 short tons) or more in weight, it is the largest existing animal and the heaviest that has ever existed. Despite their incomparable mass, aggressive hunting in the 1900s by whalers seeking whale oil drove them to the brink of extinction. But there are other reasons for why they are now so endangered.

Blue-Whale Balaenoptera Musculus

The blue whale's common name derives from bluish-hue that covers the upper side of it body, while its Latin designation is Balaenoptera musculus. The blue whale belongs to the Mysticeti suborder of cetaceans, also known as baleen whales, which means they have fringed plates of fingernail-like material, called baleen, attached to their upper jaws. Blue whales feed almost exclusively on krill, though they also take small numbers of copepods. An adult blue whale can eat up to 40 million krill in a day.

These gargantuan beasts used to dominate all the oceans of the Earth up until the late nineteenth century, when the technology was developed to effectively hunt and harvest them. In 1864, the Norwegian Sverdrup Fjell equipped a steamboat with harpoons specifically designed for catching large whales. This led to the killing of hundreds of thousands of whales up until 1966, when the International Whaling Commission banned the practice.

The blue whale certainly appears grand in size and beauty, but the sounds it produces and how it communicates are also sublime. Amazingly, their vocalizations can reach 155 and 188 decibels and have a frequency range of 10 to 40Hz. Though they typically do not "sing" in the same way that Humpback whales do, some subspecies have been observed producing songs that consist of up to four notes. Blue whale calls are still not fully understood, and scientists are currently working on determining their purposes. Among the hypotheses, researchers believe the calls could serve to determine one's geographic location, identify individuals, or locate prey.

In this regard, blue whales exhibit the capability to use echolocation, which is the same as active sonar, except that it is used by the animal itself. The identification of distance and location is done

Apples are a fruit that are a very popular choice in Australia, because of their availability all year round, their relatively low cost in the supermarket, and their sweet taste amongst many different varieties available to eat. Apples are also a nutrient dense food and are a fantastic option for those looking to improve their health while still being able to eat sweet foods.

While apples are typically grown during the harvest months of January to June, apples are usually available

FAQs

Q3. Can I use Turnitin assignments in an LMS?

You can create and use Turnitin assignments through an LMS as well.

However, please keep the following points in mind:

1. When you create a Turnitin assignment in an LMS, a Turnitin account is created with that email. In this case, you can use it after resetting your password on the turnitin.com website without requesting a separate instructor account.
2. If the LMS is not the latest LTI 1.3 version, the Turnitin interface may differ from the New TFS screen in this manual (Classic version vs. New TFS).

Q4. I logged in to Turnitin but it says the class is unavailable.

For security reasons, accounts that have not been accessed for a long period of time are "temporarily locked" and cannot use the service. In this case, please send a "temporary unlock request" email to Turnitin Korea below, and we will support you in unlocking it.
